

Topic 2.1: History of Research with People

Main Ideas

- **Good things can happen** when we do research.

The good things that can happen are called **benefits**.

- Research benefits can be for the person in the research study or for other people in the future.

- **Bad things can happen to people in research.**

The bad things that can happen are called **harms** or **risks**.

- Examples include hurting someone's body or feeling sad.

- **Research ethics** are **about making sure people are treated well** and that their **rights are respected** when they are in research.

- **Research ethics** are also about making sure **more good things happen than bad things** when we do research.
