

Topic 2.2: Rules for Scientific Research with People

Topic 2.2.1 Rules for Scientific Research with People

Main Ideas

-
- The **Belmont principles** are the values that help us think about how to treat people when they are in research. They are:
-

- Respect for persons** is about **believing that everyone can make decisions** with or without support. Respect for persons also means taking extra care of people who have a hard time making decisions.
-

- Justice** is making sure **all types of people can be in research** and that everyone shares the good and bad things that can happen in research.
-

- Beneficence** is about making research have **as many good outcomes as possible** and keeping people as safe as possible.
-
